

WANTED

**Prospective students desiring
an advanced degree in
the chemical sciences.**

The **Department of Chemistry** at **Michigan State University** features research programs that are grounded in the traditional areas of Chemistry and have a strong interdisciplinary component. We have established joint degree programs with the Biochemistry and Physics Departments. Our faculty also participate in interdisciplinary programs in Environmental Toxicology, Materials Science, Molecular Genetics, Chemical Physics, Structural Biology and Computational Biology. Our Department enjoys state of the art research facilities, a strong support staff, and competitive stipends. To learn more about the exciting opportunities available through our graduate program, contact us using the information given below.
