

## **Tulane University**

*New Orleans*

Chemistry &  
Chemical and Biomolecular  
Engineering

*Quality Graduate Education  
Faculty that care about your future*

Whether your interest is chemistry, chemical engineering, biochemical sciences, or a host of interdisciplinary programs, there are exceptional opportunities for you at Tulane. With diverse faculty, excellent resources and thorough hands on training, you are assured of earning an M.S. or Ph.D. degree that has enduring value. Areas of emphasis include biomaterials, polymer science, nanostructured and functional materials, quantum theory and molecular simulations, corrosion science, laser induced chemistry, organometallic catalysis, photovoltaics, and ultrafast spectroscopy. On top of this you'll live in New Orleans, one of America's cultural treasures.
