

WE'VE GOT CAREER MOMENTUM DOWN TO A SCIENCE.

Since 1821, a degree from USP has meant open doors. Not only to new discoveries and inventions, but to career opportunities throughout the health sciences.

Studying chemical sciences at our College of Graduate Studies leads to a comprehensive knowledge of theory and technique, strengthened by a solid foundation in pharmaceuticals. The kind of foundation that led USP grads to found six of the world's top pharmaceutical companies. And the kind of foundation that leads to opportunities that can advance careers as well as reputations.

Study full-time or part-time, with convenient evening classes. Whether you decide to earn an M.S. or a Ph.D. make those letters go farther by adding USP to them.

Visit www.usip.edu/gradchem for details and directions or call 215.596.8556.
