

ONE WORD TO DRIVE DISCOVERY

RENSELAER.

The department of **Chemistry and Chemical Biology** at Rensselaer Polytechnic Institute is soliciting applications from students interested in pursuing a Ph.D. in an interdisciplinary environment with research opportunities in emerging fields such as biotechnology and nanotechnology.

Rensselaer's graduate program is tailored to the needs and research interests of individual students. A full financial package, including a competitive stipend, is available to qualified students. For more information, visit www.rpi.edu/dept/chem or contact Professor Wilfredo Colon, Ph.D., at colonw@rpi.edu.

Application deadline is Jan. 15. Early applications are encouraged, including consideration for special fellowship programs through NSF IGERT and NIH.
